Volume Three

Support for Vision Research

Digitized by the Internet Archive
in 2011 with funding from
Lyrasis Members and Sloan Foundation

<http://www.archive.org/details/visionresear03nati>

This volume of *Vision Research — A National Plan* contains the extensive project data used by the National Advisory Eye Council and its consultants as background information for assessing current needs and opportunities in vision research, identifying priorities for future support, and addressing major issues relating to the National Eye Institute's program. The publication of these data also fulfills the recommendations made in the Council's first report, *Vision Research Program Planning*, published in 1975, that the National Eye Institute provide for "periodic distribution for vision research program planning material to the research community" and that an "annual statistical analysis of the research program" be prepared. The 1975 report included the results of the first comprehensive survey of current (FY 1974) support for vision research in the United States. A compilation of similar data for FY 1975, entitled *Support for Vision Research*, was published as an interim report of the Council.

The present volume contains, as did its antecedents, information on vision research projects funded by the National Eye Institute; other components of the National Institutes of Health; other agencies of the Department of Health, Education, and Welfare; other federal government programs; and selected national private, voluntary, and philanthropic organizations. Projects supported by state and local governments, foreign governments, universities, corporations, and the resources of individual investigators are not included because information from these sources was either incomplete or unavailable.

In publishing these data, the Council reaffirms its belief that an annual survey of vision research projects provides essential information that can be used to assess gaps in support and to identify research areas for which current funding appears to be adequate. By reviewing support provided not only by the National Eye Institute but also by other public and private agencies, the Council and its consultants acquire broad insight into the relevance of vision research to a variety of scientific and public interests. Also, through this process, knowledge is gained of projects whose primary goals may be other than the understanding of visual processes and the prevention, diagnosis, and treatment of visual disorders, but which nevertheless have some relevance to the interests of the National Eye Institute.

Introduction

Summary

Table 1 summarizes the vision research projects included in this volume. The Table shows that in fiscal year 1976, over \$72 million was spent for vision research by federal government and national not-for-profit organizations in the United

States. These funds were provided by the National Eye Institute, other Institutes of NIH and other DHEW agencies, other organizations within the federal government, and by national private, philanthropic, and voluntary health organizations. Of these, the National Eye Institute was the largest single source of vision research support, accounting for 69 percent of the total funds. It should be noted that the amount shown for the National Eye Institute, \$50,212,000, is the total NEI appropriation for FY 1976. This sum exceeds the total amount of the NEI projects listed in this volume, for it includes funds for NEI direct operations (in addition to intramural research) unobligated balances, and supplemental awards.

Excluded from these totals are approximately \$28 million in projects listed in this volume as being "indirectly" relevant to the mission and program of the National Eye Institute, as explained below.

Table 2 breaks down the totals in Table 1 according to federal agencies and national private, philanthropic, and voluntary health organizations. That components of NIH other than the National Eye Institute provide support for vision research demonstrates the variety of disease and scientific problems with which this discipline is concerned. In some instances, this support is for projects that include the eye among a number of organ systems in which a particular disease is being studied. In such cases, an attempt has been made to identify that portion of funding limited to the eye alone, although this is frequently difficult to do. The fact that an Institute other than the National Eye Institute is supporting any given project indicates either that the primary focus of the research is oriented to the mission of that Institute (e.g. a project investigating the role of systemic hypertension in diabetic retinopathy may be supported by the National Heart, Lung, and Blood Institute) or that NEI funds were not available to support the project at the time it was approved but that another Institute, whose mission also encompassed the project, was interested in and able to fund it.

Vision research supported by other DHEW programs and by other federal agencies is also closely related to the overall mission of the funding organization. Examples are a study of infectious keratitis in cattle supported by the Department of Agriculture and investigations by the Department of Defense of protective measures for combat-related laser irradiation of the eye. Vision research supported by the National Science Foundation is primarily concerned with basic neural mechanisms; vision research underway in Veterans Administration hospitals is concerned with the problems often encountered in patients seen in these institutions. In a number of instances, the Veterans Administration research projects are conducted in conjunction with other projects supported by the NEI and frequently involve the same principal investigator.

It is important to note that the total listed for National Private, Philanthropic, and Voluntary Health Organizations includes only support for the research awards listed in this volume. It excludes research-related support provided by such organizations for facilities construction, equipment, and other important research resources.

TABLE 1
SUMMARY OF VISION RESEARCH FUNDING, FY 1976

	Amount of Funding	Percent of Funds
Federal Government		
National Eye Institute	\$50,212,000	69
National Institutes of Health (Exclusive of NEI)	8,568,156	12
Department of Health, Education, and Welfare (Exclusive of NIH)	4,079,217	6
Other Federal Support	7,541,532	10
National Private, Philanthropic, and Voluntary Health Organizations	2,176,924	3
TOTAL	\$72,577,829	100

Subtotal: National Private, Philanthropic, and Voluntary Health Organizations	\$ 2,176,924
TOTAL	\$72,577,829

*Two projects were funded at the Department level.

**This does not include \$5,466,000 raised for building eye research centers during 1976 through RPB's laboratory construction program.

Organization

Project information in this report is organized under three major headings: (1) NEI program data, (2) research of *direct relevance* to the NEI program sponsored by other organizations, and (3) research of *indirect relevance* to the NEI program sponsored by other organizations. Projects considered directly relevant to the NEI program are defined as those whose primary objective, as determined from a review of their abstracts, is to learn something about either the normal structure or function of the visual system or about the etiology, pathogenesis, prevention, diagnosis, or treatment of visual disorders. Those considered to be of indirect relevance are projects in which the visual system or its components are only minor or incidental elements or in which the eye is merely used as a test system or tool to gain information on topics other than normal or abnormal vision. Examples are a study of visual perception in which psychological or behavioral factors are the primary concern, an investigation of visual factors in aerospace flight, and a study of the effect of ethanol on the pupillary reactivity of alcoholics. Other kinds of projects included in this category are those in which basic mechanisms relating to the eye are studied or in which systemic factors that affect the eye are investigated — but in tissues other than those of the visual system.

Data Sources

The primary source used to identify these projects was the Smithsonian Science Information Exchange (SSIE). Abstracts of over 1,500 research projects identified by the SSIE as vision-related were carefully reviewed by members of the NEI's scientific staff. Lists of the projects selected by the NEI staff for inclusion in this report were submitted to each supporting agency for verification or completion. As a result of the exchange of information which followed, additional projects were identified that were subsequently reviewed for relevance to the NEI's program, and projects no longer active were deleted. As a result, about twice as many projects are included in the current report as in either of the earlier ones. This may be due in part to increased support of vision research by agencies other than the NEI in FY 1976, but certainly the principal reason is the considerable effort made to identify relevant projects. Whether a project is listed as having either direct or indirect relevance to the NEI program has in great part been determined by the individual reviewer's judgment. And, because titles alone frequently do not indicate the actual scope or content of the project, some listed projects may not seem to be related at all to the NEI program. However, the Council is satisfied with the accuracy and comprehensiveness of these lists, given the present limitations of methods for coding, retrieving, and analyzing the type of data they contain.

Some information on funding by private organizations was obtained from the SSIE, but most of this information was acquired by direct contact with groups known to support vision research.

Data Classification

Within each of the three categories, most projects are listed according to the five NEI programs: *Retinal and Choroidal Diseases*, *Corneal Diseases*, *Cataract*,

Glaucoma, and *Sensory and Motor Disorders of Vision*. A sixth multiprogram class has been established for projects that cannot be so classified.

Funding often had to be estimated for vision research projects supported by organizations other than the NEI, especially those funded through large multiprogram grants. This was done either by dividing the number of separate vision-related projects included as part of a large grant into the total dollars awarded for that grant and using the resulting figure for each vision component, or by using the funding agency representative's estimate of the proper amount. Unfortunately, there are projects listed for which no estimate of funding could be made. This is often the case with research projects conducted intramurally by government scientists because there is seldom a project-by-project accounting of the costs of such research.

For the National Eye Institute's intramural research projects, an attempt was made to estimate total direct costs. These costs are not easily compared with the direct costs listed for NEI grant-supported projects because the amounts identified for grants represent only the National Eye Institute's support for a project. The NEI frequently does not pay the total costs of these projects; complementary support is provided by the grantee institution and in many cases by other funding sources. The NEI must, however, pay all the costs of its own intramural research.

NEI Program Data

Vision research projects supported by the NEI during FY 1976 are divided into seven sections. The first five sections list projects supported in the five NEI research programs, the sixth includes projects relating to more than one program, and the seventh presents NEI research training and career development awards. Within the first five sections, lists of the following are included when applicable: research project grants (alphabetically and according to each of several subprograms), specialized clinical research center grants, research contracts, and intramural research projects. Core center grants constitute the multiprogram category. For vision research training and career development awards, the four tables list institutional research training awards, individual postdoctoral awards, research career development awards, and academic investigator awards. Except for the institutional awards that often support training related to more than one area of vision research, each of these tables is organized according to the five NEI programs.

All lists include only projects that were *active* in FY 1976. Some active awards did not receive FY 1976 funds but were supported with money appropriated during a previous year and are so designated. Projects printed in italics were initiated with funds awarded during the Transition Quarter. This three-month period, July to September 1976, was the result of a shift in the start of the federal fiscal year from July 1 to October 1 beginning with FY 1977 as required by the Budget Control and Impoundment Act of 1974. The NEI material in this report is current up to the end of the Transition Quarter.

Research Sponsored by Other Organizations— Projects of Direct Relevance to the NEI Program

Again, the projects grouped within this category are considered to be of direct relevance to the mission of the NEI; that is, they are primarily concerned with gaining new knowledge and understanding of the normal functioning of the eye and visual system, the pathology of visual disorders, and the sciences underlying vision.

Within each of the five NEI programs to which these projects correspond, there is a list of the extramural grants, contracts, and intramural projects of all other components of NIH and DHEW, all other federal funding, and support by private, philanthropic, and voluntary organizations.

Research Sponsored by Other Organizations— Projects of Indirect Relevance to the NEI Program

In this category the vision-related portion of the listed projects may be incidental and involve ocular tissues or visual function only secondarily, if at all. Such projects, which together account for almost \$28 million, are listed here because they relate to vision research in its broadest sense and may be of interest to the readers of this report. This funding, however, is not included in the summary tables of vision research support by United States public and private agencies which appear above. As in the preceding category, projects listed here are supported by other components of NIH and DHEW, by the rest of the federal government, and by private, philanthropic, and voluntary organizations. Again, although they are grouped according to their relationship to the five NEI programs, the projects in this category bear only indirectly upon the mission of the NEI.

Index

The last section of this volume is a multipart index. In it, the reader can identify every project listed in this volume according to research subject and approach. The Entry Number for each project (1 through 2334) is included under at least one of three headings: *Primary Diseases and Conditions of the Eye* (Medical and Biological Studies), *Vision and Perception* (Behavioral Studies), and *General Body Diseases and Conditions Involving the Eye* (Medical and Biological Studies). The first heading includes biomedical studies of the eye itself and its central pathways. The second encompasses behavioral studies of vision and perception representing the functional aspects of the central or peripheral retina, the functional neurology of the receptive field, psychophysical studies, or similar work. Studies of the eye as affected by general body states and diseases are included under the third heading. Each of these three matrices is divided into two parts: *Human and Clinical* and *Animal and Laboratory* research. Studies that have both laboratory and clinical components are listed in both groups.

Within each matrix of this index, research Subjects (ocular structure, visual function, or systemic condition or disorder) are listed horizontally, and research Approaches are listed vertically. The intersections of all Subjects and Approaches form blocks, most of which contain Entry Numbers corresponding sequentially to the projects listed in all three sections of this volume. The Entry Numbers may be used to find the titles and associated information listed for each of the related projects. An appendix on the last page of the index continues those boxes too small to hold all the applicable Entry Numbers.

Terms Used in NEI Data Tables

Research Objective. Etiology, Diagnosis, or Treatment. Assigned by NEI to each project based on the investigator's description of the planned research activity. If a project does not appear to be distinctly related to Diagnosis or Treatment, it has been categorized as applicable to Etiology, which includes pathogenesis and other basic research objectives.

Grant Number. This is the official Public Health Service identification number, which consists of several parts. The first digit refers to the grant's application type according to the following code:

1. New
2. Competing Renewal
3. Supplement
4. Noncompeting Renewal (Fellowship and Research Career Programs)
5. Noncompeting Continuation
6. Change of NIH Supporting Institute or Division (Fellowships and Training Programs)
7. Change of Grantee Institution
8. Change of NIH Supporting Institute or Division (Non-competing Continuation)
9. Change of NIH Supporting Institute or Division (Competing Renewal)

1. **New.** A request for support for a project or program not currently receiving Public Health Service support. If approved, it must compete with other new applications, competing renewal applications, and competing supplemental applications for any available funds in accordance with funding priorities.

2. **Competing Renewal.** An application for extending support for one or more *Budget Periods* for an existing grant whose current *Project Period* is terminating. These applications are subject to the same review as new applications, and they compete for available funds with other competing renewal applications, new applications, and competing supplemental applications.

3. **Supplement.** A request for additional funding for an active grant within an approved *Budget Period* to support certain types of program expansion or administrative cost increases. Applications for program expansions are subject to the same review procedures as new or competing renewal applications. Applications for funds to meet increased administrative costs for approved activities usually do not require a formal assessment by peer reviewers but are subject to the approval of the NEI and the availability of funds.

4. **Noncompeting Renewal (Fellowship and Research Career Programs).** Identifies a request for additional support beyond that previously recommended and does not compete for available funds.

5. **Noncompeting Continuation.** A request for continued support of a grant for a subsequent *Budget Period* within a previously approved *Project Period*. The level of support is determined by the

NEI after consideration of the Council's previously recommended level of support, the progress of the project, and the availability of funds. It is the policy of the National Institutes of Health to do everything it can within the boundaries of prudent management to avoid discontinuities of support during a *Project Period*.

The second part of the number is a three-digit code identifying the various NIH research grant or contract mechanisms used by the NEI.

Research Project Grants

- R01 Project Grant (traditional). Supports a discrete, specified, circumscribed project initiated and performed by the named principal investigator(s).
- R13 Conference Grant (traditional). Supports international or national meetings, conferences, and workshops.
- R23 Special Visual Sciences Research Award Program. Supports laboratory and clinical studies by newly trained investigators to aid the development of their research careers.

Program Project and Center Grants

- P01 Research Program Project Grant. Supports broadly based, multidisciplinary, often long-term research programs that have specific objectives. (There was only one NEI Research Program Project Grant still active in FY 1976, and this mechanism has been phased out.)
- P30 Core Center Grant. Supports shared resources and facilities used by a number of investigators who hold active research project grants.
- P50 Specialized Clinical Research Center Grant. Supports research and development activities that are directed toward a specific disease entity or biomedical problem, especially toward improving the capability of applying scientific knowledge to clinical problems.

Research Contracts

- N01 Research Contract. Supports the development and/or application of new knowledge or the testing, screening, or evaluation of a product, material, device, or component for use by the scientific community. Typically, the NEI restricts the use of this award to the support of multicenter, fixed protocol clinical trials, to the maintenance of specialized research resources such as colonies of animals with visual system disorders which are similar to those observed in humans, or to the support of specialized instrumentation development.

Institutional Research Training Grants

- T01 Graduate Research Training Program. Assists and extends the training of individuals preparing for research and academic careers related to vision.*
- T32 Institutional National Research Service Award. Enables institutions to support predoctoral and postdoctoral research training and to assist and extend training of individuals preparing for research and academic careers related to vision.

*This training mechanism is superseded by Title I, Public Law 93-348, the National Research Act of 1974 and is being phased out.

Research Fellowships

- F02 Postdoctoral Fellowship. Supports postdoctoral research training in vision research.*
- F03 Special Fellowship. Supports individuals in mid-career to help them advance their research skills.*
- F22 Individual Research Fellowship. Helps broaden the scientific background of vision scientists working in specified shortage areas and extends the potential for research in vision-related areas.*
- F32 Postdoctoral Individual National Research Service Award. Supports postdoctoral research training to enable individuals to broaden their scientific background and extend their potential for research in vision-related areas.

Research Career Program Awards

- K04 Research Career Development Award. Encourages the further development of research careers of scientists who have demonstrated potential for independent research in vision and ophthalmology.
- K07 Academic Investigator Award. Fosters the development of newly trained laboratory scientists and clinicians for careers as independent investigators in basic and applied vision science.

For further discussion of these various support mechanisms, see pertinent sections of Volumes One and Two of this report.

The awarding organization is identified by the two letters which begin the next part of the grant number; EY signifies the National Eye Institute. The next five digits are generally assigned sequentially and represent the grant's official serial number. The suffix that is separated from the serial number by a hyphen indicates how many years the project or award has been active. The letter A signifies an amendment, a grant for which additions or changes have been made in the original application and which has been resubmitted for peer review. (Project numbers for NEI intramural projects conclude with CB for Clinical Branch, LVR for Laboratory of Vision Research, and OBE for Office of Biometry and Epidemiology.)

Entry Number. Serial number by which each project is identified in this volume only for use with the indexes beginning on page 260.

Project Period. Indicates the total period of time authorized for funding an award.

Budget Period. The actual calendar period (usually 12 months) into which the grant's total *Project Period* is divided for budgetary and reporting purposes.

Subprogram (Area). A key to these letter codes appears before the tables for each NEI program.

Direct Costs. Expenditures for personnel, equipment, consultants, travel, and other costs directly related to the performance of research under a specific grant.

Indirect Costs. The costs incurred by an organization that are not readily identifiable with a particular project or program but are necessary to the operation of the organization and the performance of these projects and programs. Each institution has its own indirect cost rate; the FY 1976 average rate for NIH is 40 percent of the *Direct Costs* for all individual projects.

Total Awarded. The sum of *Direct Costs* and *Indirect Costs*. It does not include unobligated balances from previous years deducted from the current year's total award.

*This training mechanism is superseded by Title I, Public Law 93-348, the National Research Act of 1974 and is being phased out.

Principal Investigator	Title of Project	Institution	FY 1976 Total Awarded
LIEBMAN, PAUL A	Microphotometric Studies on Retinal Rods and Cones	University of Pennsylvania	98,652
LITMAN, BURTON J	Role of Macromolecules in Photoreceptor Membranes	University of Virginia	31,395
LOLLEY, RICHARD N	Maturation of Metabolism in Normal and Dystrophic Retina	University of California, Los Angeles	37,526
MARMOR, MICHAEL F	Interaction Between Retina and Pigment Epithelium	Stanford University	67,376
McConnell, David G	<i>Studies of Retinal Rod Cyclic GMP Phosphodiesterase</i>	<i>Michigan State University</i>	39,252
McFARLAND, WILLIAM N	Environmental Light and Visual Pigments	Cornell University	38,017
MILLER, WILLIAM H	Structure and Function of Eyes	Yale University	57,063
MUNZ, FREDERICK W	Genetics of Visual Pigments	University of Oregon	38,097
NAKANISHI, KOJI	Structural and Conformational Studies of Visual Pigments	Columbia University	17,485
NAKANISHI, KOJI	Pigment Formation with Retinals	Columbia University	62,033
NOELL, WERNER K	Vulnerability of the Retina to Light and Other Agents	State University of New York at Buffalo	69,678
OLSON, MARK D	The Fine Structural Development of Bruch's Membrane	George Washington University	34,325
OSTROY, SANFORD E	Related Molecular and Physiological Events in Vision	Purdue University	37,087
PANNBACKER, RICHARD G	Cyclic Nucleotide Function in Retinal Photoreceptors	University of Colorado Medical Center	31,367
PAUTLER, EUGENE L	Transretinal Potential and Sugar Transport in Mammals	Colorado State University	39,386
RAVIOLA, ELIO	Freeze-Fracture Studies on the Retina	Harvard University	45,109
REID, TED W	Role of Glutamine Transferase in the Retina	Yale University	49,166
REIF-LEHRER, LIANE	Biochemical Control in the Normal and Diseased Retina	Harvard University	105,898
ROBB, RICHARD M	Histochemistry of Phosphodiesterase in the Retina	Children's Hospital Medical Center, Boston	56,913
ROCKEY, JOHN H	Primary Structural Studies of Visual Pigments	Presbyterian-University of Pennsylvania Medical Center	55,435
SAARI, JOHN C	Biochemistry of the Retina and Pigment Epithelium	University of Washington	44,270
SCHMIDT, SUSAN Y	Biochemical Studies of Retina and Pigment Epithelium	Harvard University	84,704
SLOAN, SHERWIN H	Cyclic Nucleotide Metabolism in the Human Retina	University of California, Los Angeles	10,065
SREBRO, RICHARD	Molecular Basis of Photoreceptor Activity	State University of New York at Buffalo	70,863
STANLEY, H EUGENE	Normal and Abnormal Mechanisms of Vision	Massachusetts Institute of Technology	37,479
STEINBERG, ROY H	Pigment Epithelial Ion Transport and Retinal Function	University of California, San Francisco	78,863
STRYER, LUBERT	Conformational Aspects of Visual Excitation	Yale University	56,073
WAGGONER, ALAN S	Visual Excitation — Early Molecular Events	Amherst College	24,853
WALD, GEORGE	Chemistry and Physiology of Visual Excitation	Harvard University	78,489
WARSHEL, ARIEH	Theoretical Studies of the Vision Process	University of California, Los Angeles	25,031
WINKLER, BARRY S	Photoreceptor Electrogenesis: Dynamics and Controls	Oakland University	51,473
WOOTEN, BILLY R	Retinal Mosaicism in Females Carrying Color Blindness	Brown University	26,487
WRIGHT, ALLEN K	Size and Shape Determination of Rhodopsin in Solution	University of Tennessee Center for the Health Sciences	54,006

Principal Investigator	Title of Project	Institution	FY 1976 Total Awarded
WRIGHT, ANTHONY A	Hue Discrimination Studies	University of Texas Health Science Center	24,385
YGUERABIDE, JUAN	Conformational Dynamics of Excitable Membranes	University of California, San Diego	
YOUNG, RICHARD W	Histophysical and Histochemical Studies on the Eye	University of California, Los Angeles	91,465
YU, HYUK	Membrane Fluidity and Photoreceptor Function	University of Wisconsin, Madison	42,931
ZIMMERMAN, WILLIAM F	Biochemistry of Visual Cell Renewal and Visual Cycles	Amherst College	25,952
Total Active Grants for Area: 90

Total Projects for Program: 32			Total Dollars for Program: 1,017,111	

II. Corneal Diseases

Subprograms

II. CORNEAL DISEASES

- A. External Ocular Infections and Inflammatory Diseases
- B. Dry Eyes and Tear Abnormalities, Epithelial Disorders, and Drug Delivery
- C. Refractive Problems and Contact Lenses
- D. Corneal Edema, Dystrophies, and Inherited Disorders
- E. Corneal Transplantation and Stromal Injury and Repair
- F. Tumors and Other Lid, Conjunctival, and Orbital Problems

II. Corneal Diseases

Total Projects for Program: 7			Total Dollars for Program:	272,928

III. Cataract

Subprograms

III. CATARACT

- A. The Normal Lens
- B. Senile or Degenerative Cataract
- C. Diabetic Cataract
- D. Congenital, Metabolic, and Genetic Cataracts
- E. Cataract Induced by Drugs and Radiation and Occurring Secondary to Other Eye Disorders
- F. Dislocated Lens
- G. Accommodation and Optical Problems of Cataract and Aphakia

III. Cataract

NATIONAL EYE INSTITUTE RESEARCH PROJECT GRANTS ACTIVE FY 1976 — SUBPROGRAM LISTING			
A. Congenital, Developmental, and Degenerative Abnormalities			
AREES, EDWARD A	Development of Optic Pathway During Embryogenesis	Massachusetts General Hospital	57,028
CAFFERATA, ROBERT L	The Expression of Neuronal Specificity	University of Rochester	49,473
CASAGRANDE, VIVIEN A	Effects of Visual Deprivation in Primates	Vanderbilt University	67,200
CHOW, KAO L	Neurology of Vision and Learning	Stanford University	66,145
COWAN, W MAXWELL	Quantitative Anatomical Studies of Visual Deprivation	Washington University	90,990
DAW, NIGEL W	Neural Mechanisms of Vision	Washington University	50,275
Duffy, Frank H	<i>The Role of Inhibition in Experimental Amblyopia</i>	Children's Hospital Medical Center	95,209
FIFKOVA, EVA	Visual Deprivation and Synapses of Visual Centers	University of Colorado	40,029
GEORGE, STEPHEN A	Vision in Triploid Animals	Amherst College	12,808
GOLLENDER, MORTON	Development Studies of Stereoscopic Vision	Oregon Optometric Center	*
GROBSTEIN, PAUL	Development of Connectivity in Visual Systems	University of Chicago	36,516
GUILLERY, RAINER W	Abnormalities in Visual Pathways	University of Wisconsin, Madison	37,043
HAMASAKI, DUO I	Effect of Visual Deprivation on Vision	University of Miami	70,717
HANSON, THOMAS E	Developmental Topology of Vertebrate Visual Systems	Temple University	28,372
HARTING, JOHN K	Cortical Effects of Sensory Deprivation	University of Wisconsin, Madison	26,485
HENDRICKSON, ANITA E	Development of the Primate Retina and Visual Thalamus	University of Washington	42,909
HIBBARD, EMERSON	Visual Restoration	Pennsylvania State University	45,091
HICKEY, TERRY L	Development of the Retinogeniculate System	University of Alabama in Birmingham	24,378
HIGGINS, KENT E	Peripheral Mechanisms in Functional Amblyopia	Pennsylvania College of Optometry	9,039
HIRSCH, HELMUT V	Development and Functions of the Visual Cortex	State University of New York at Albany	45,683
HUGHES, WILLIAM F, III	Neuronal Development in the Visual System	Rush-Presbyterian-St. Luke's Medical Center	10,398
KAISERMAN-ABRAMOF, ITA R	Structure and Development of the Visual System	Case Western Reserve University	66,740
KALIL, RONALD E	Developmental Studies of the Visual System	University of Wisconsin, Madison	37,353
KANDEL, GILLRAY L	Photopic and Scotopic Vision of Strabismic Amblyopia	Rensselaer Polytechnic Institute	43,012
KRUGER, LAWRENCE	Visual Projections of Vertebrate Midbrain	University of California, Los Angeles	62,717
LAEMLE, LOIS K	An Experimental Study of the Developing Visual System	College of Medicine and Dentistry of New Jersey	25,325
LUND, JENNIFER S	Structure and Development of Visual Cortex	University of Washington	*
LUND, RAYMOND D	Development and Plasticity of Visual Connections	University of Washington	54,274
Murphy, Elizabeth H	<i>Development of the Mammalian Visual System</i>	University of Chicago	*
NODA, HIROHARU	Neuronal Basis of Visual Perception in Eye Movements	University of California, Los Angeles	40,661
PEARLMAN, ALAN L	Functional Organization of the Visual System	Washington University	32,107

Principal Investigator	Title of Project	Institution	FY 1976 Total Awarded
POKORNY, JOEL M	Psychophysical Studies of Color-Defective Observers	University of Chicago	19,644
POWERS, ALICE S	Visual System Structure and Function	Bryn Mawr College	20,476
REINECKE, ROBERT D	Stereopsis and Microtropia in Amblyopia Pathogenesis	Albany Medical College	53,279
REINECKE, ROBERT D	Young Vision Scientist Travel Support	Albany Medical College	10,492
SCHNEIDER, GERALD E	Neuropsychological Studies of the Visual System	Massachusetts Institute of Technology	92,420
SHARMA, SANSAR C	Genesis of Neural Specificity in the Visual System	New York Medical College	73,520
SHERMAN, S MURRAY	Effects of Visual Deprivation on the Visual System	University of Virginia	69,666
TRUJILLO-CENOS, OMAR	Neuron Differentiation and Specification in the Eye	Biological Sciences Research Institute, Uruguay	9,860
VICTOR, MAURICE	Vitamin B12 Deficiency in Rhesus Monkeys	Case Western Reserve University	24,450
VON NOORDEN, GUNTER K	Clinical and Laboratory Studies of Amblyopia	Baylor College of Medicine	72,927
WATKINS, DAVID W, III	Visual Deprivation: Effects on Striate Neurons	University of Virginia	4,142
Yee, Robert D	Ocular Motor Subsystems in Congenital Nystagmus	Los Angeles County Harbor General Hospital	14,020
Total Active Grants for Subprogram: 43			
Total Grants for Subprogram Receiving FY 76 Funds: 38			
Total Dollars For Subprogram:			1,623,644

B. Strabismus and Other Oculomotor Disorders

1. Strabismus

COGAN, ALEXANDER I	Interocular Suppression in Strabismus	Institutes of Medical Sciences, San Francisco	50,467
NAKAYAMA, KEN	Three-Dimensional Eye Rotation Measurements: Strabismus	Institutes of Medical Sciences, San Francisco	44,427
SCHOR, CLIFTON M	Abnormal Eye Movement in Strabismus and Amblyopia	Oregon Optometric Center	45,114
Total Active Grants for Area: 3			
Total Grants for Area Receiving FY 76 Funds: 3			
Total Dollars for Area:			140,008

2. Oculomotor Control

BACH-Y-RITA, PAUL	Peripheral Neurophysiology of Eye Movements	Insitutes of Medical Sciences, San Francisco	*
BAKER, ROBERT G	Eye Movement: Physiological Organization	University of Iowa	*
Baker, Robert G	Eye Movement: Physiological Organization	New York University	50,714
BARMACK, NEAL H	The Peripheral Components of Eye Movement Control	Good Samaritan Hospital and Medical Center	65,678
BREININ, GOODWIN M	Fine Structure of Normal and Pathologic Ocular Muscle	New York University	119,205
CHIARANDINI, DANTE J	Physiology and Pharmacology of Extraocular Muscles	New York University	53,609
COLLINS, CARTER C	Human Oculomotor Motility	Institutes of Medical Sciences, San Francisco	74,265
FUCHS, ALBERT F	Neurophysiological Studies of the Oculomotor System	University of Washington	32,884
GESTRIN, PHYLLIS J	Neural Control of Eye Movements	University of Texas, Austin	49,157
GORDON-LICKEY, BARBARA	Superior Colliculus and the Control of Eye Movements	University of Oregon	47,235
HERMANN, HOWARD T	Compensatory Visual Neural Changes with Eye Movements	Massachusetts Institute of Technology	*
HIGHSTEIN, STEPHEN M	Synaptic Linkage of the Reticulo-Oculomotor Circuits	Yeshiva University	8,400

Principal Investigator	Title of Project	Institution	FY 1976 Total Awarded
KELLER, EDWARD L	Studies on the Alert Primate Oculomotor System	University of California, Berkeley	35,042
MATIN, LEONARD	Eye Movements and Visual Direction	Columbia University	88,074
OYSTER, CLYDE W	Neurophysiology of Optokinetic Nystagmus	University of Alabama in Birmingham	27,616
ROBINSON, DAVID A	Oculomotor Control System	Johns Hopkins University	82,064
SPARKS, DAVID L	Eye Movement Control: The Role of Brain Stem Neurons	University of Alabama in Birmingham	*
WESTHEIMER, GERALD	Oculomotor Control	University of California, Berkeley	107,798
Zee, David S	<i>Oculomotor Disorders: Clinical and Experimental Study</i>	Johns Hopkins University	39,233
Total Active Grants for Area: 19			
Total Grants for Area Receiving FY 76 Funds: 13		Total Dollars for Area:	791,027
Total Active Grants for Subprogram: 22			
Total Grants for Subprogram Receiving FY 76 Funds: 16		Total Dollars for Subprogram:	931,035

C. Optical and Pupillary Disorders

COHEN, GERALD H	Pupil Response as an Index for Chromatic Mechanisms	University of Rochester	41,580
HILL, RICHARD M	Effects of Refractive Error in Single Cell Coding	Ohio State University	17,683
HOLLINS, MARK	Causes and Time Course of Accommodative Micropsia	University of North Carolina, Chapel Hill	6,850
POLSE, KENNETH A	Contact Lens Effects on Refractive Error	University of California, Berkeley	46,970
Total Active Grants for Subprogram: 4			
Total Grants for Subprogram Receiving FY 76 Funds: 4		Total Dollars for Subprogram:	113,083

D. Visual Sensory and Perceptual Disorders

1. Neural Mechanisms

BAKER, FRANK H	Thalamic Mechanisms in Visual Processing	Johns Hopkins University	36,392
BARLOW, ROBERT B, JR	Functional Organization of the Visual System	Syracuse University	87,877
BERNARD, GARY D	Optical Information Processing in Eyes	Yale University	*
BERNARD, GARY D	Optical Information Processing in Eyes	Yale University	91,395
BISHOP, LEWIS G	Neurophysiology of an Optomotor Response	University of Southern California	48,181
BOYNTON, ROBERT M	Psychophysiological and Optical Studies of Vision	University of California, San Diego	*
BROOKS, BARBARA A	Visual Processing During Eye Movement	University of Texas Health Science Center	67,078
BROOKS, BARBARA A	Visual Processing During Eye Movement	University of Texas Health Science Center	*
CARLSON, STANLEY D	Neuropile Reconstruction by HVEM and Other Methods	University of Wisconsin Madison	38,671
COOL, STEVEN J	Correlates of Binocular Visual Stimulation	University of Texas Health Science Center	*
CROSSLAND, WILLIAM J	Development and Maintenance of Visual Connections	Wayne State University	28,090
DeVALOIS, RUSSELL L	Electrophysiology of Color Vision	University of California, Berkeley	64,462
EBBESSON, SVEN O	Organization of the Vertebrate Visual System	University of Virginia	86,851
EMERSON, ROBERT C	Image Movement: Neural Processing Mechanisms	University of Rochester	39,693

Principal Investigator	Title of Project	Institution	FY 1976 Total Awarded
ENROTH-CUGELL, CHRISTINA A	Retinal Ganglion Cell Responses to Time Varying Stimuli	Northwestern University	56,785
FAHRENBACH, WOLF H	Organization of Visual Centers in the Limulus Brain	Medical Research Foundation of Oregon	22,626
FREEMAN, JOHN A	Synaptic Organization of the Optic Tectum	Vanderbilt University	38,164
GANZ, LEO	Neuropsychology	Stanford University	32,450
GIOLLI, ROLAND A	Visual and Non-Visual Cortical Efferents	University of California, Irvine	16,077
GOLDBERG, STEPHEN J	Inputs to Abducens Neurons: An Intracellular Study	Virginia Commonwealth University	9,671
GRANDA, ALLEN M	Processing of Visual Information	University of Delaware	59,520
HARTH, ERICH	Visual Receptive Fields by a New Method	Syracuse University	43,321
HARTLINE, PETER H	Integration of Visual and Infrared Neural Images	University of Illinois, Urbana	37,305
HASCHKE, RICHARD H	Retrograde Axonal Transport in the Visual System	University of Washington	64,467
HELD, RICHARD	Vision and Visuomotor Mechanisms	Massachusetts Institute of Technology	86,442
HODOS, WILLIAM	A Behavioral Analysis of Visual System Evolution	University of Maryland	69,336
HUBEL, DAVID H	Organization of the Visual System	Harvard University	187,201
KRIPKE, BERNARD R	Organization of Striate Cortex	University of Utah	44,972
MARROCCO, RICHARD T	Physiology of Visual Afferent Pathways	University of Oregon	26,176
MICHAEL, CHARLES R	Neurophysiology of All-Cone Vision	Yale University	58,794
MOTE, MICHAEL I	Cellular Basis of Visual Integration	Temple University	43,590
NORTON, THOMAS T	Neural Mechanisms of Developing Vision	Duke University	*
POLLEN, DANIEL A	Spatial Selectivity in Non-Striate Visual Cortices	Massachusetts General Hospital	53,570
REMMEI, RONALD S	Inputs to Pontine Reticular Formation Projections to the MLF	University of Arkansas Medical Sciences	26,115
SCALIA, FRANK	Anatomical Correlates of Subcortical Visual Function	Downstate Medical Center	23,501
SCHILLER, PETER H	Studies of Interaction Between Eye Movement and Vision	Massachusetts Institute of Technology	82,749
SHAPLEY, ROBERT M	Spatial Summation and Dynamics of Visual Neurons	Rockefeller University	42,591
SNODDERLY, D MAX, JR	Functional Description of Visual Mechanisms	Eye Research Institute of Retina Foundation	59,036
SPEAR, PETER D	Visual Integration in the Brain	University of Wisconsin, Madison	57,563
SPELTING, HARRY G	Excitability of Visual Pathways	University of Texas Health Science Center	48,294
SPRAGUE, JAMES M	Brain Mechanisms of Visual Learning and Transfer	University of Pennsylvania	66,394
STERLING, PETER	Anatomy and Physiology of Visuo-Motor Systems	University of Pennsylvania	61,695
STUART, ANN E	Neural Mechanisms in Processing Visual Information	Harvard University	*
TIGGES, JOHANNES W	The Efferent Fibers of the Visual Cortices	Emory University	35,752

Principal Investigator	Title of Project	Institution	FY 1976 Total Awarded
WATERMAN, TALBOT H	Sensory Mechanisms in Visual Orientation	Yale University	65,959
WHITEHEAD, RUSSELL A	Morphology and Function of Visual Systems	Macalester College, Saint Paul	37,162
WIESEL, TORSTEN N	Studies of the Visual System	Harvard University	129,981
Total Active Grants for Area: 47			
Total Grants for Area Receiving FY 76 Funds: 41			
Total Dollars for Area:			2,275,949

2. Psychophysical Functions

BROWN, JOHN L	Vision: Spatial, Temporal and Adapting Effects	University of Rochester	*
RUSHTON, WILLIAM A H	Transmission of Signals Through Human Retina	Florida State University	*

Subject Approach				
	General	Input/Output	The Visual Stimulus	Oculomotor Performance
Equipment and Methods	1405, 1427, 1505, 1508, 1520, 1521, 1525, 1527, 1529, 2079, 2135, 2141, 2142, 2190, 2271, 2282, 2290	591, 660, 698, 1342, 2172, 2202	660, 698, 720, 1320, 1520, 1522, 1526, 2269, 2282	603, 660, 720, 1309, 1320, 1404, 1406, 1437, 1501, 1505, 1511, 1513, 1521, 1583, 2135, 2141, 2190, 2192
Behavioral Tests	725, 1363, 1403, 1520, 1554, 1974, 1995, 2062, 2094, 2227, 2283	64, 106, 211, 577, 597, 616, 623, 641, 647, 667, 676, 690, 698, 709, 1414, 1561, 1567, 2094, 2202, 2227	647, 672, 698, 723, 730, 1363, 1421, 1498, 1515, 1520, 1974, 2178	6, 616, 679, 1403, 1437, 2192
Neurological Correlates	715, 1330, 1334, 1354, 1398, 1427, 1597, 1608, 1945, 1971, 1983, 2005, 2019, 2031, 2209, 2237, 2241, 2282	106, 569, 577, 623, 641, 660, 664, 690, 709, 714, 715, 1334, 1354, 1461, 1584, 1605, 1661, 2170, 2172, 2209	660, 720, 730, 1461, 2219, 2282	586, 596, 623, 652, 660, 661, 682, 716, 720, 741, 742, 1331, 1424, 1611, 1943, 2183, 2209
Evaluation and Clinical	See IV Appendix	64, 125, 1318, 1334, 1425, 1605, 1609, 2018, 2022	672, 1515, 1520, 1522, 1600, 2157	6, 125, 595, 623, 658, 684, 694, 708, 741, 742, 1403, 1420, 1423, 1432, 1490, 1505, 1521, 1602, 1611, 1612, 1847, 1911, 1912, 1943, 2249, 2255, 2317
Electrophysiology	715, 721, 1425, 1608, 1912, 1983, 1989, 2051, 2132, 2230, 2236, 2237, 2241, 2273, 2281, 2318, 2319	125, 577, 580, 623, 709, 715, 1425	570, 672, 1320, 2219	125, 586, 623, 682, 741, 1309, 1320, 1331, 1912, 2103, 2236
Evoked Responses	721, 1356, 1425, 1427, 1597, 1600, 1608, 1974, 1983, 2000, 2015, 2031, 2157, 2226, 2229, 2230, 2249, 2283, 2318, 2319	125, 580, 591, 1425, 1524, 1605, 2015	570, 672, 730, 1522, 1524, 1600, 1974, 2157, 2234	125, 2103, 2249
Approaches to Perception	See V Appendix	641, 698, 709, 1058, 1077, 1334, 1342, 1409, 1412, 1480, 1547, 1566, 1567, 1609, 1960, 2053, 2070, 2094, 2145, 2159, 2163, 2164, 2170, 2191, 2201, 2202, 2209, 2233, 2276, 2307, 2333	698, 1363, 1412, 1421, 1429, 1476, 1515, 2178, 2242, 2254, 2285, 2301, 2307	639, 1058, 1367, 1383, 1384, 1408, 1409, 1430, 1443, 1476, 1480, 1483, 1501, 1511, 1513, 1576, 1581, 1599, 1602, 1960, 2012, 2032, 2047, 2082, 2145, 2147, 2163, 2183, 2186, 2190, 2209, 2233
Developmental	See VI Appendix	590, 641, 1354, 1372, 1392, 1415, 2018, 2053, 2094, 2095, 2096, 2164, 2227	1363, 1545, 1600, 2242, 2253	694, 1364, 1367, 1383, 1384, 1430, 1437, 1572, 2012, 2045, 2047, 2147, 2181, 2236
Environmental Effects	1381, 1405, 1509, 1519, 1521, 1609, 1612, 1813, 1979, 2014a, 2030, 2101, 2131, 2132, 2135, 2140, 2141, 2142, 2160, 2161, 2239	1517, 1609	601, 1522, 2269	1404, 1406, 1517, 1521, 1612, 1847, 2030, 2135, 2141, 2246, 2255
Basic Mechanisms	1363, 1575, 1666, 1974	106, 569, 591, 597, 671, 709, 1342, 1411, 1422, 1428, 1547, 1561, 1567, 1590, 1661, 1960, 2165, 2191, 2307	1342, 1363, 1429, 1974, 2242, 2307	603, 1428, 1583, 1590, 1593, 1599, 1960

Sensory-Motor Integration	Stimulus Integration	Complex Perception	Visual Acuity	Discrimination	Retina in Perception
